Project Problem Statement Submission Form

Sec No- 9	Team No-	Project Title- Hospital Mediflow Tracker Dashboard
Team Lead Roll Number		2520030607
Team Lead Name		I.Harshika
Team Member Roll Number		2520030120
Team Member Name		Bhavitha Reddy

1. Abstract

(Summarize the project idea, problem background, and proposed solution. Not more than 250 words.)

In healthcare facilities, inefficient bed management and poor patient flow tracking often lead to delays in treatment and reduced quality of care. The Hospital MediFlow Tracker Dashboard is designed to solve these challenges by providing a real-time, centralized platform for monitoring hospital operations. The system displays bed availability across different wards, indicating whether beds are available, occupied, or under maintenance, helping hospital staff make quick decisions, reduce waiting time, and improve emergency response. It also tracks the complete patient journey from admission to discharge, allowing staff to access patient details such as illness, treatment progress, medications, doctor visits, and discharge status. The system supports patient transfers, alerts, and history tracking, improving coordination and efficiency. Overall, the dashboard enhances hospital workflow and ensures better patient care.

2. Module Mapping

(Provide details of how modules are divided among team members.)

Module Name	Assigned Roll Number(s)	Signature
Secure Login & Staff Authentication	2520030607	
Dashboard & Hospital Status Management	2520030120	
Bed & Ward Management	2520030607	
Patient Admission , Transfer , Discharge & Treatment Tracking	2520030607	
Alerts & Notification System	2520030120	
Data Storage , History Tracking & Admin Panel	2520030120	

3. Module Details

(Explain the responsibility of each student concerning their assigned module.)

Student 1:

I am responsible for the following modules:

Dashboard UI (Real-Time View), Patient Admission & Details, Patient Tracking & Treatment, Data Storage & History Tracking.

Student 2:

I am responsible for the following modules:

Bed & Ward Management, Transfer & Discharge Management, Alerts & Notifications, Admin Control Panel

4. Frameworks / Platforms / Software Used

(List the frameworks, libraries, platforms, or tools you plan to use.)

- Frontend: HTML, CSS, JavaScript
- Framework: React.js
- Backend: Node.js
- Database: Firebase / MongoDB
- Frameworks/Libraries: Bootstrap / Tailwind CSS
- Development Tools: VS Code
- Version Control: Git & GitHub
- Platform: Web-based Application
